

About BASICs

BASICs is committed to providing superior IT services and support to ensure your business operates at full capacity. Network interruptions and downtime translates to loss of revenue and productivity. We aim to prevent disruptions caused by technology to keep your business running smoothly.

Our Services

- **Network Monitoring & Management**
BASICs performs deep network monitoring using SNMP, Syslog, and Traps giving us a deeper look into traffic using NetFlow / sFlow / IPFix protocols.
- **Device Monitoring & Maintenance**
BASICs monitors customer devices ranging from Windows to Mac, networking hardware, as well as websites, DNS records, and email servers. Whether its software or hardware updates, BASICs provides routine maintenance across your entire business.
- **Help Desk & Remote Access**
BASICs has best-in-class remote access, providing quick and reliable support to address day-to-day IT-related interruptions.
- **Patch Management**
BASICs's state-of-the-art patching engine allows us to patch operating systems as well as third-party software, so you can rest easy knowing your systems are always up-to-date.
- **Layered Security Approach**
BASICs tackles our client's security from various angles - we deploy and manage antivirus on the endpoints, monitor router firewall configuration for changes, manage and track backup jobs, and monitor traffic flow.
- **IT Consulting**
BASICs provides IT expertise to help evaluate the health of your business and deliver a robust IT and security plan that will scale as your business grows.

Don't let unpatched software put your business at risk

For many companies, patching has become an unmanageable liability. Two-thirds of organizations struggle with prioritizing and keeping up with updates, and the cost of falling behind can be massive. Unpatched systems and software provide easy openings for cyber attacks, which cost businesses an average of \$3 million in 2018, according to the Ponemon Institute.

How can you stay secure without updates slowing you down? BASICS can help.

Solution: Worry-free, hassle-free patching from BASICS

Windows Updates

We take the guesswork out of Windows patching and ensure you never miss a critical fix.

3rd-party Updates

We keep your software secure and running smoothly with the latest features and fixes.

Off-hours Scheduling

We deploy updates around your employees' busy schedules. That means no disruptions.

Clear Reporting

Get peace of mind knowing your devices are compliant and secure.

Take the pain out of patching. Let BASICS handle OS and software updates so you don't have to.
